

PENDANTS & CHANDELIERS

VIAPLANT 2025

Plant-based creative materials for architecture and design.

Viaplant manufactures creative composite materials for architecture and design with its unique appearance determined by the use of real plant components. Our goal is to bring the beauty and diversity of nature closer, and to create values in living spaces by telling stories through plants.

The brand is fundamentally defined by its philosophy, the so-called story concept, which stems from the place of origin of the plants and the memories associated with them. This value can be conveyed by the flora of iconic places, the lawn of a famous football stadium, or the recycling of a bridal bouquet. Something that connects to us.

VIAPLANT

The FLONDER lamp combines simplicity in form with a connection to nature.

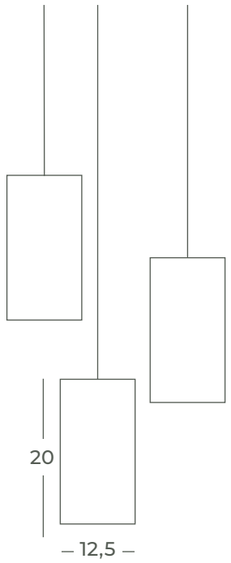

With its sleek cylindrical shape and unique plant patterns, its light transcends mere functionality. Whether as a table lamp or a ceiling fixture, every element of the Flonder lamp reflects attention to detail and timeless elegance.

This is just the beginning – the collection will soon expand with new pieces, bringing even more light and a nature-inspired experience into our homes.

GROSS 1 kg

MATERIALS

BASE: ASH WOOD
SHADE: Viaplant® TEXTILE

VIAPLANT

The RUNDO lamp is where nature meets elegance.

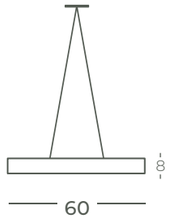

Its gracefully curved, circular form brings the soft play of light into your home, like moonlight gently embracing the walls and ceiling. Bold yet delicate, it floats like a work of art, creating both atmosphere and a special ambiance in any space.

LIGHT SOURCE

The Rundo is not just a decorative piece and mood lighting but also a functional light source! The back-mounted LED technology provides a brightness of 4000 lumens, delivering perfect illumination. Additionally, the color temperature and brightness can be adjusted as desired, allowing it to adapt to any mood or setting.

VIAPLANT

The COLUMNA collection blends pure design with organic textures, which creates timeless elegance.

During the design of the COLUMNA lamps and furniture, our goal was to create a clean design as well as for the material to show its special textures.

plants and textures

The obvious character of Viaplant is the plant itself – its details, colour and texture record one moment in time of the plant's development, whether it is a leaf, flower petal or plant stem.

Similarly, to amber that captures the history of life, Viaplant material encapsulates nature's artistic performance and preserves it in the long run. The colours from seasonal variations, the real plant textures and the originating location, all add an emotional dimension to the Viaplant material.

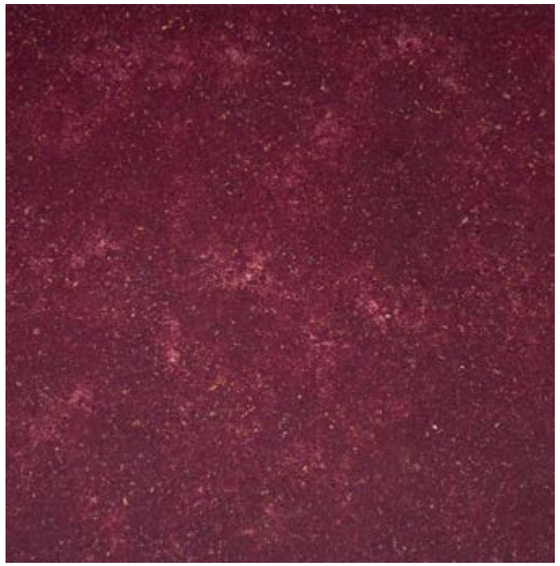

2025

Peonia | *Peony*

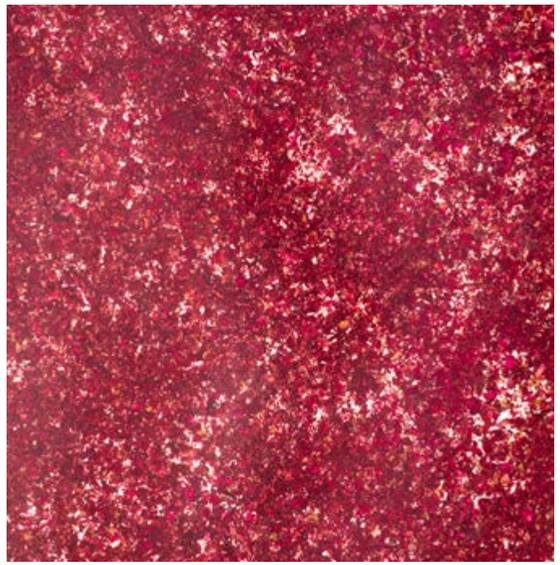

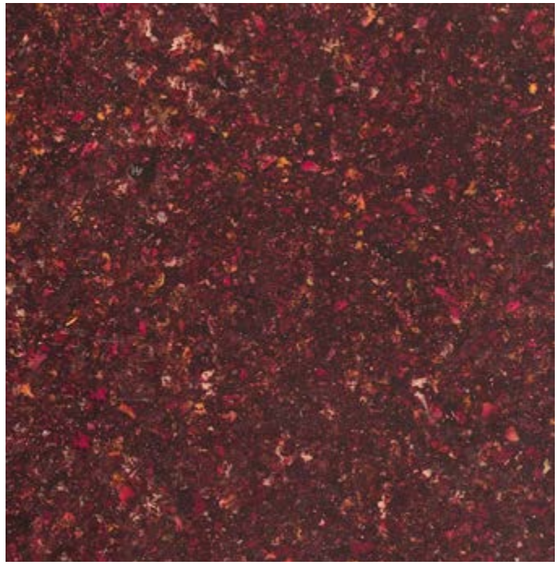

Rosa | *rose*

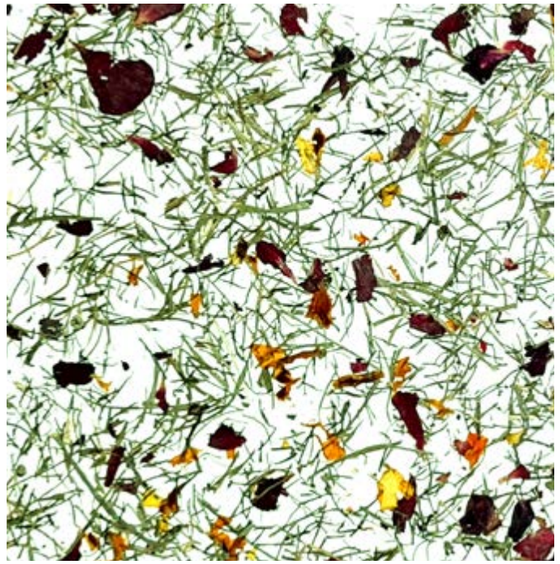

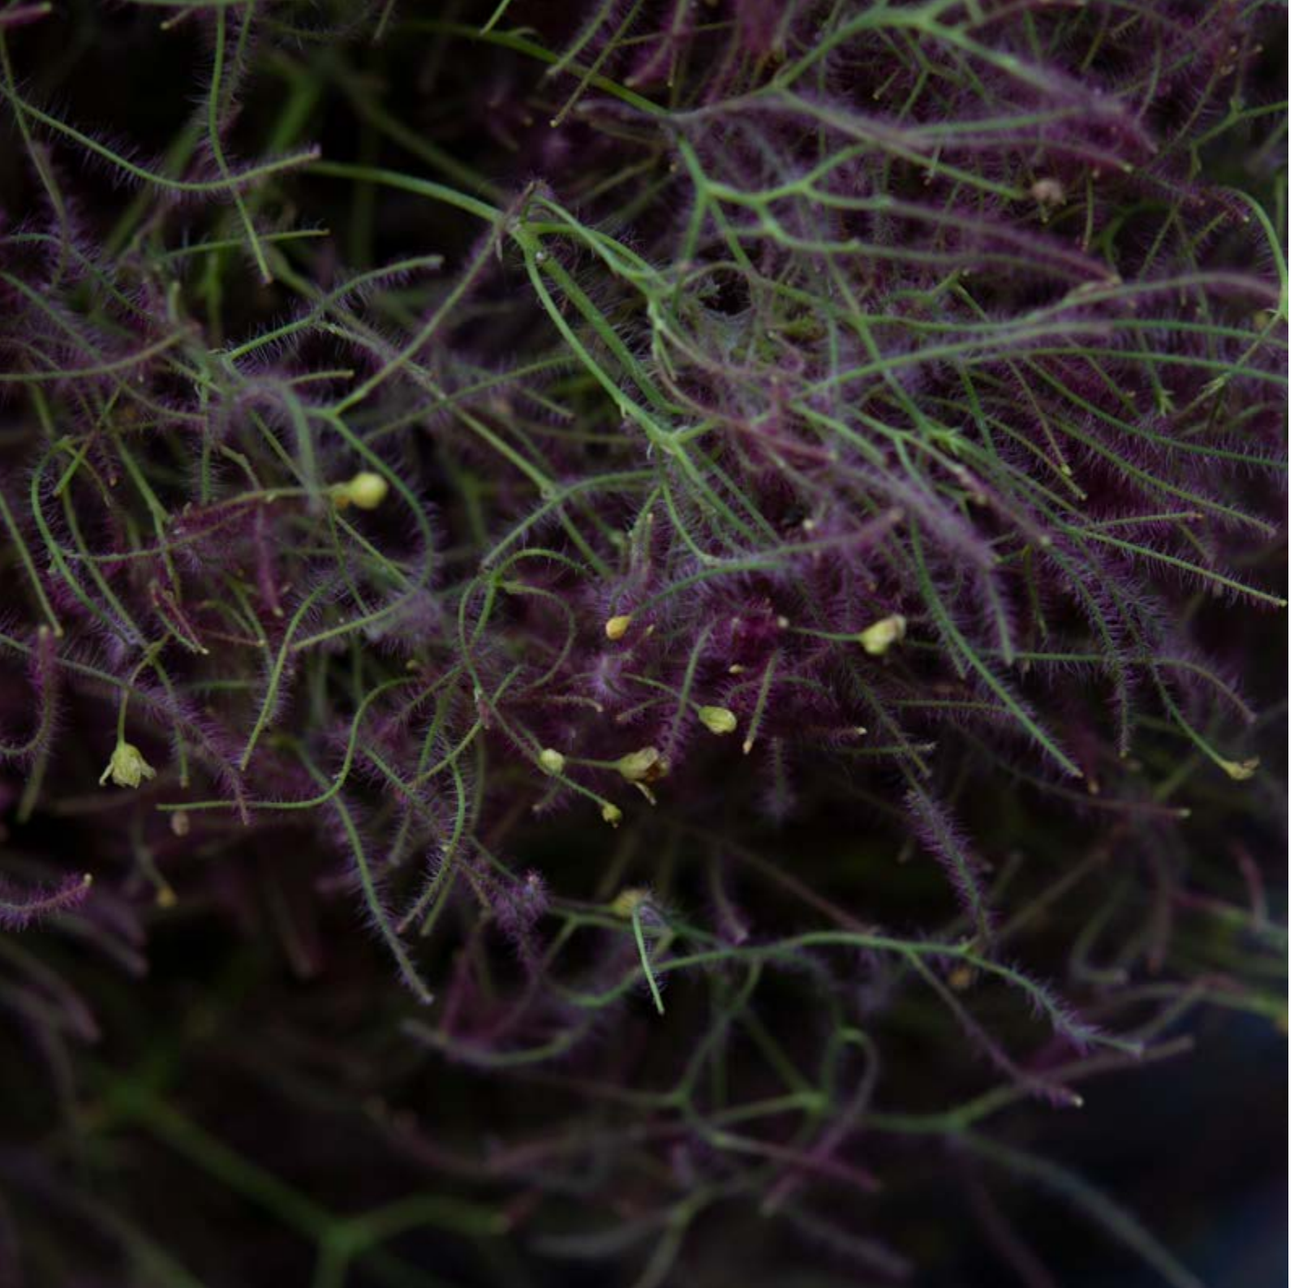

Poa Flori |

grass with flowers

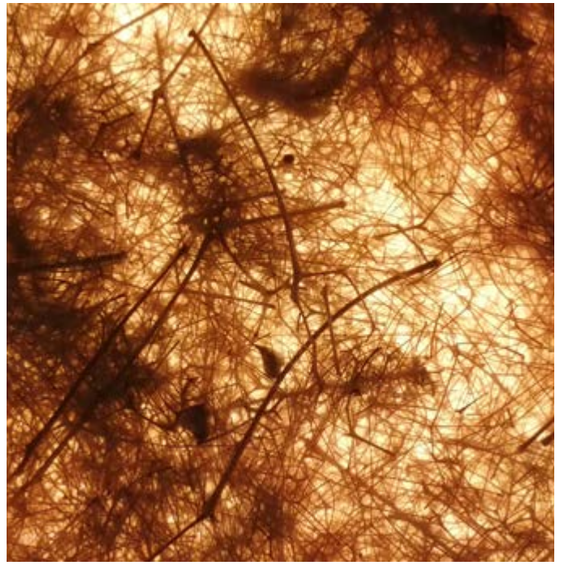

Cotinus | *Smoketree*

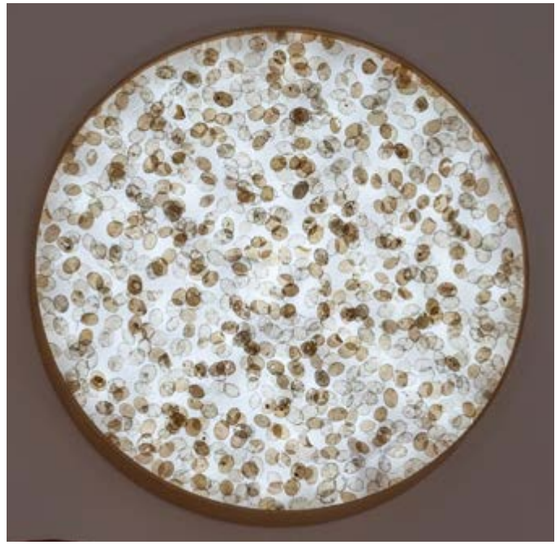

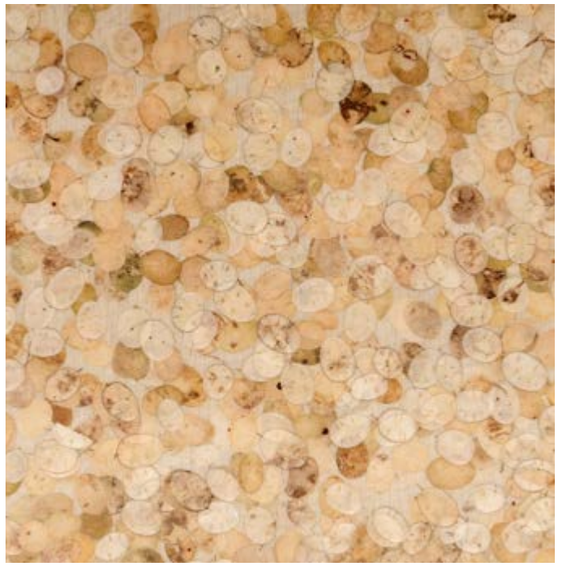

Lunaria | *Annua honesty*

"The delicate beauty of the honesty plant's translucent seed pods exudes a fragile elegance. The dry, silvery husks hang gracefully from the slender stem, resembling tiny works of art. This natural composition evokes both abstract artistic creations and fine craftsmanship.

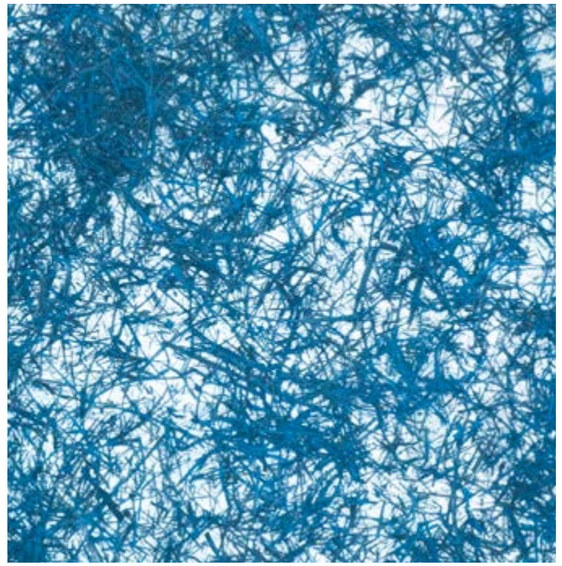

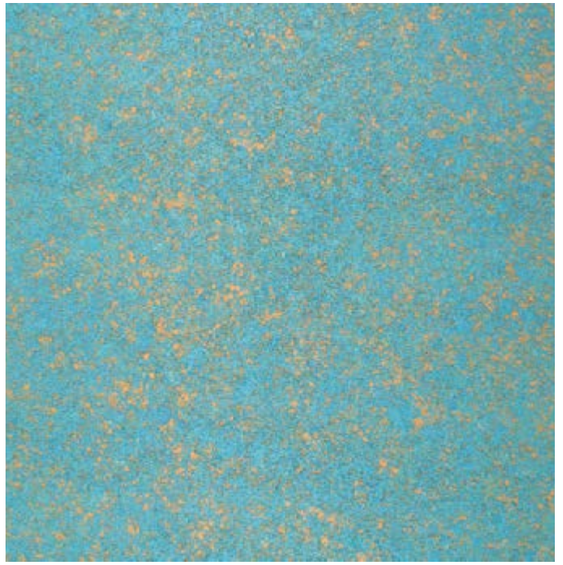

Lignum blue |

Tinted Woodwool

Lignum color combines woodwool with human imagination. The texture of the tinted woodwool creates a modern effect, and when illuminated, it gives an impressive atmosphere.

Phragmit | *Reed*

Calam-triticum |

Bushgrass - straw

“The quiet beauty of the feather grass meadow, shrouded in mist, radiates a delicate harmony. Amidst the golden stems of the dry inflorescences, the distant forest edge emerges mysteriously, providing a picturesque backdrop to the scene. The composition is both abstract and natural, reminiscent of the ‘pliage’ motifs in Simon Hantai’s paintings. The captivating pattern is perfectly expressed even on the small surface of a lamp, capturing the serene atmosphere of the summer meadow.”

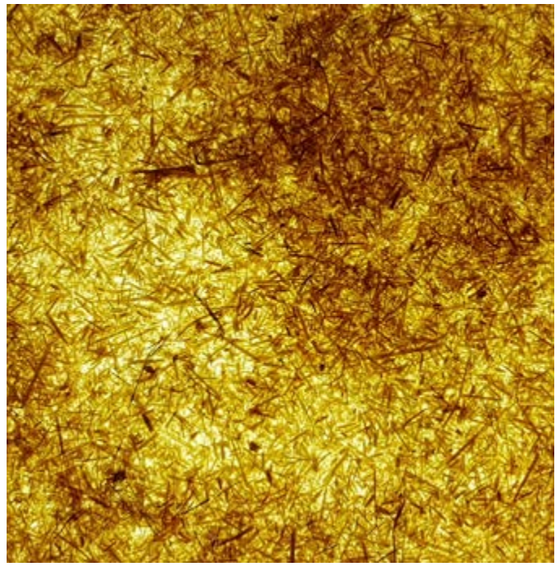

Triticum | *Wheat straw*

Flores mix | *Mixed petals*

Bespoke textures - Storytelling concept

A good object is defined by your understanding of what it means to you.

The Viaplant brand is fundamentally defined by its philosophy, the socalled story concept. The duality of form and function is complemented by a story that stems from the place of origin of the plants and the associated memories.
