LEAF LAB WORKSHOP

BOTANICAL LAMPSHADE DESIGN WORKSHOP

VIAPLANT

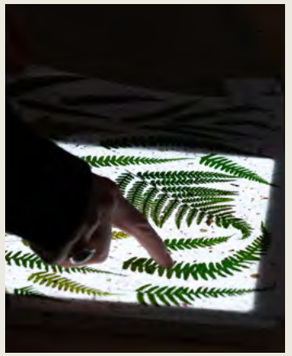

The Leaf Lab Workshop invites participants to create a bespoke botanical lampshade using Viaplant's plant-based material.

Guided by the Viaplant team, natural elements are transformed into a unique light object, preserving personal memories through contemporary design.

/01 PLANT SELECTION

Participants may bring meaningful plant elements to the workshop — such as flowers from a special bouquet, leaves from a family garden, or plants collected in nature. Alternatively, a curated selection of plants is provided on site, allowing participants to work entirely with Viaplant materials. Plants brought by participants should be in a dried condition.

/02 PATTERN CREATION

During the workshop, the Viaplant team guides participants in selecting and arranging the plants. Where needed, additional botanical elements are provided to complete and refine a unique, personal pattern.

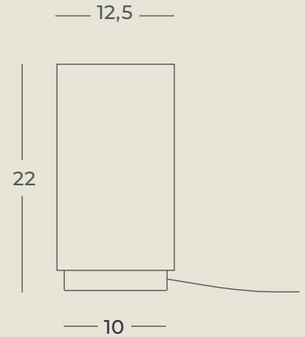

/03 LAMP PRODUCTION

The finished pattern is transferred to the Viaplant studio, where it is transformed into a handcrafted Flonder table lamp.
The completed lamp can later be collected from the Viaplant showroom, or shipped for an additional delivery cost.

VIAPLANT

TABLE LAMPS

Each LEAF LAB WORKSHOP results in a unique object shaped by nature and personal choice. We look forward to welcoming participants and guiding them through this distinctive design experience.
